Skills

Programming languages

Java, C

Version control

Git, Github

Operating systems

Linux, Windows

Web technologies

HTML, CSS

Containerization

Docker

Scripting

Bash scripting

Cloud provider

AWS

Serverless Application service

AWS Lambda

Configuration management

Ansible

Infrastructure provisioning

Terraform

CI/CD Tools

Github Actions , Jenkins

projects

- AWS S3 Event Triggering Project: Developed a Bash script to create and configure an AWS S3 bucket, an AWS Lambda function, and an AWS SNS topic that sends email notifications on S3 object creation.
[LINK](#) 
- I developed a Bash script to report the usage of AWS resources such as S3, EC2, Lambda, and IAM users. In order to automate this process, I integrated the script with a cronjob to run every day at 6 pm and generate a report of resource usage
[LINK](#) 
- Implemented Ansible playbook to automate the installation and configuration of Nginx on slave EC2 instances, ensuring consistent setups across multiple hosts.
